Sustainable Growth CV

Ted specialises in the fields of sustainability, climate change, environment, corporate social responsibility, health and safety, compliance, management systems and the management of change. He provides a range of consultancy, training auditing and verification services in these areas and has worked with a wide variety of organisations in many different countries.

He is a Chartered Mechanical Engineer with an MBA. He is also an IEMA Registered Principal Environmental Auditor (one of the first appointed) and a Chartered Environmentalist. His early background was in the power industry, working in the UK, Middle East and South America. He moved into the field of management consultancy in the 1980's. With a growing interest in environmental issues, he formed the Environment Division of PA Consulting Group towards the end of that decade. He then founded the Sustainable Growth Company Ltd as a sustainability consultancy in 1991 and is its managing director to this day.

He has worked with a wide variety of sectors including retailers, major multi-national oil companies, telecommunications, manufacturers, the food and drinks industry and the Public Sector. Ted currently fulfils a number of roles and these are summarised below.

Ted has been a Corporate Social Responsibility Advisor to B&Q since 1998 and this has involved working with their supply chain on the B&Q QUEST programme. QUEST is at the forefront of the retail industry's approach to social responsibility and 'Product Stewardship'. The work embraces sustainability, ethical trading and health and safety. It involves advising on policy, requirements and vendor assessment; the development of vendor assessment methodologies; delivery of training to vendors; and assessments of vendors and their products including visits to factories in the Far East.

He has been a contracted Lead Verifier and Assessor to Lloyds Register Quality Assurance since 1998 as well and is a UKAS Accredited Lead Verifier for Eco-Management and Audit Scheme and for the EU Emissions Trading Scheme, a Corporate Responsibility and Sustainability Report Verifier and an ISO 14001 Lead Assessor. He has been involved assignments with over 120 organisations in the following sectors: oil and gas, telecommunications, power generation, chemical, paper and pulp, manufacturing, contracting and project management and local government.

Ted provided the third party assurance of the BT Corporate Social Responsibility Report for 2006 against the Global Reporting Initiative Standard and in accordance with the Accountability AA 1000 Assurance Standard. He also provides the assurance for the JTI annual health, safety and environment report each year and this has involved travel all over the world.

He provides consultancy support to variety organisations in the areas of compliance, management systems and the management of change. Ted has worked with numerous organisations on the implementation of ISO 14001 and also BS OHSAS 18001. Typical services include: the provision of consultancy and training services and the development of customised IT based environmental management systems and associated documentation.

Ted also prepares and presents SGC's IEMA Approved Advanced EMS Auditor Course and has been delivering the course for over 10 years.

Ted is an accredited Carbon Trust Standard Assessor.
